WASTE/RECYCLING SERVICES SURVEY COMING

Newcastle residents should be on the lookout for a survey that will soon arrive in mailboxes. The City is considering changes to its garbage, recycling, and yard waste collection services that it contacts for through Waste Management. Your answers to this short survey will help the City determine if and how it should make changes to these services.

The City of Newcastle is looking into the possibility of revising its existing relationship with Waste Management, although we are not able to use a different company at this time. The City is legally bound to contract with Waste Management for at least the next 7 years.

The survey should take only a few minutes to complete. Once you receive it, you are asked to return it to City Hall by mail or in person, or take the same survey online through the City blog www.newcastle411.com. The City will review the surveys and then communicate the results and any changes to residents. Your participation will be greatly appreciated.
